## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In Claim 1, the terms "mobile" and "substantially stationary" have opposite meanings and are therefore indefinite. In Claim 2, on line 10, the plural "enclosures" should be changed to the singular --enclosure--.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirose(JP10171383), cited on Applicant's IDS.

Hirose discloses spinning body 1, on pivot B, substantially enclosing self-contained drive 2 powered by light C and biased by the direction of an ambient field of energy, i.e., gravity. It is noted any object having mass is biased by gravity.

### ***Allowable Subject Matter***

4. Claims 2-33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Neither Hirose (JP10171383) nor Honda (JP02214886), the closest prior art of record, failed to teach or disclose an enclosure, buoyantly supported by fluid, enclosing a self-contained drive mechanism powered by energy derived from electromagnetic radiations.
